

UNFPA provides about 40% of the world's contraceptives, reaching more than 20 million people every year.
BUT IT'S NOT ENOUGH.

214 MILLION

women want to avoid pregnancy but are not using modern contraceptives.

MORE THAN 88 MILLION

unintended pregnancies occur in developing countries every single year.

COUNTLESS WOMEN

are caught in a cycle of back-to-back pregnancies, poor health, and poverty.

Family Planning Helps Women, Families, Communities, and Countries!

If women and young people can access contraceptives, they can **finish school and join the workforce.**

Every \$1 invested in family planning can **save governments up to \$6.**

When women and young people can plan their families and futures, **entire communities and nations thrive.**

**Show your support for access to safe, voluntary family planning.
Please make your contribution to Friends of UNFPA today!**
